About BayCath Medical

BayCath Medical partners with catheter-based medical device companies to provide fast-paced, iterative development. R&D device prototypes are quickly iterated alongside our customers to find the best solutions together. Our pilot production ensures smooth transitions into production; while project management mitigates delays and communicates progress.

External Partners

Laser Cutting	Handle Design
Medical Coating	Extrusion
Overmolding	Laser Welding
Injection Molding	Catheter Testing
Balloon Blowing	Sterilization

New Customer Special

Prototypes in 2-3 Weeks
\$3k for 1 Sample
\$4k for 3 Samples

*Most Catheters, Best Effort Tolerances
